

RNS EBIOSS ENERGY, SE

December 4th 2017

English translation of the RNS published today at 12.35pm in MAB

**EXTENSION OF THE UPDATE OF INFORMATION ON THE REVERSE
TAKEOVER OPERATION BETWEEN THE EQTEC PLC AND EQTEC
IBERIA SL SUBSIDIARIES**

With the aim of extending the information to our shareholders and to the shareholders of EQTEC PLC about the strategic meaning of the transaction referred in the title of this Relevant Fact, the objectives of the operation are briefly reviewed below:

- Convert EQTEC into a global technological leader in the waste elimination and recovery sector
- Transform EQTEC into the global technological solution at the service of waste management companies, local public administrations and the largest Global Construction Companies, such as our partner Energy China
- Contribute and consolidate in EQTEC a portfolio of projects with an installed capacity of approximately 66MWe and other projects under negotiation.
- Incorporate new strategic global partners in EQTEC to accelerate the expansion of its technology
- Convert EQTEC PLC into the owner of the EGT technology patents (Eqtec Gasifier Technology), incorporating from this moment the income from recurring sales.

The EBIOSS' Board of Directors is very pleased to update the market at this very important moment for our shareholders and for the shareholders of EQTEC PLC, converting the Company from a project developer to a highly specialized and competitive global technology company. The reverse take over puts us in a very favorable position to achieve our goal of becoming a leading global company in the sector of waste elimination and waste recovery.

We remain at your disposal for any further inquiry.

Sincerely,

Sofía (Bulgaria), December 4th 2017.

D. José Óscar Leiva Méndez

President of EBIOSS ENERGY, SE
